

PROJECT CLOSURE REPORT

Group No – 14

Members –

2021_Ayush Sisodia

2103_Mudit Tiwari

1)General Information:

- Overall productivity achieved.

The Project included two members of the group

Project members	No of day	No of hrs/PERDAY	Total hours
Ayush Sisodia	15	6 Hrs	90
Mudit Tiwari	15	6 Hrs	90

- Number of complaints

NO complaints achieved during the process of project

- Process used and process deviations.

At beginning the developers has planned to implement the DRIVER part in homepage, but during the development DRIVER part was done by Admin.

- Estimated and actual start and end dates of the project.

Proposed date	Implementation date	Starting date	End Date
05/03/2021	09/03/2021	10/03/2021	26/03/2021

- Tools used.

Name of tools	Works
VSCODE	For code Writing and Editing
MYSQL	For storing data
POSTMAN	For testing Requests
Notepad++	For editing code
SPRING TOOL SUIT 3	For coding

1) Risk Management

- Risk identified at the start of the project –
 - 1.) Risk in implementing Booking data
 - 2.) Risk in Calling the username on the homepage
 - 3.) Risk in Searching the Driver by pin-code
 - 4.) Linking of pages (Routing)
- Risk encountered during the project
 - 1.) Risk in Driver search
 - 2.) Risk in Admin Control
- Notes on risk mitigation
 - 1.) Giving direct access to Database to eliminate Admin page Risk
 - 2.) Using React-js for Calling username

2) Size:

- Estimated and actual size (in KLOC)

Project	Size (no of lines)
Driver Booking System	7000(approx.)

- Notes on Estimation

✓ Do not count comments as lines of code

3) Defects:

- SDLC stage-wise defects

SDLC FLOW	DEFECTS
Design	No defects
Implementation	Admin
Testing	Some lines should be commented to avoid override of data
Evaluation	No defect
Analysis	No defect

- Distribution of defects as major, minor etc.

Name of Defect	Major	Minor
Admin Page	Major	-
Driver Search	Major	-
Overriding of data		Minor
